

# iBar: interactive bar

*The Hot Spot for Interaction and Engagement*

Model **IB225I**

## Create a Memorable Experience for Your Venue

iBar is the interactive bar top makeover that every modern bar, major event, and trade show needs. Draw bystanders over to your bar and engage them through the iBar's rich multi-touch bar interface. Powered by dreamTouch™, this interactive animation and effects driven multi-user software can engage guests while promoting your brand and messaging.

CUSTOMIZATION

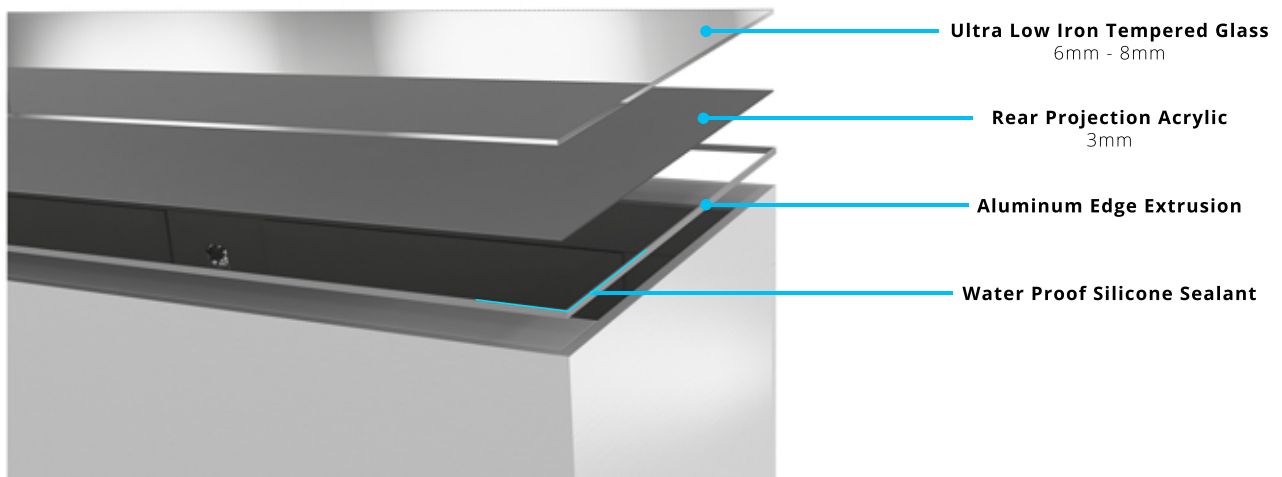

# The iBar Knows No Limits

You have the choice of purchasing a pre-built iBar, ideal as a standalone rental or as a multi-unit configuration set up. Our pre-built system has proven to deliver results and remain highly reliable in just about any environment. You also have the choice of specifying your custom iBar dimensions to retrofit your existing bar, or for building a brand new system from the ground up. No matter what you choose one thing is for certain, guests will be raving about your venue after experiencing the iBar.

# Customize Your iBar Experience

Included with the iBar is dreamTouch™, the leading software solution for visual effect driven experiences. With its own CMS, dreamTouch™ is a simple yet powerful and sophisticated application that can be used to promote ones brand and messaging. Take advantage of several pre-built animations and effects right out of the box. For a truly unique experience you have the option of custom programming your own TUIO compliant applications.
