Interactive software developed with aesthetic integrity

Interactive Software Solutions

Software can either make or break an interactive experience. Our goal is to ensure that it delivers the functionality it promises. We obsess over the design and function of our apps as well as the coherent messages they deliver. You can expect our interactive software solutions to illicit excitement and encourage discovery with your audience.

Interactive Social Media

- Harness the power of interactive social apps that draw your audience and inspire engagement.
- Interactive solutions ranging from passive displays to fully interactive multi-user platforms.
- **Ideal for tradeshows, events, brand activations, and many other venues.**

Multi Touch Presentation

- Design focused applications that users can trust and enjoy interacting with. [Demo](#)
- Powered by intuitive pre-built content management systems.
- **Ideal for large format touch display, interactive kiosks, touch tables, and tablets.**

Custom App Development

- Custom tailored UI/UX to communicate your message exactly the way you want.
- Leverage advanced technologies such as gesture, AR, user recognition, and multi user interaction.
- **Delivered a la carte with intuitive content management systems.** [Ask us for more info.](#)

Tailoring solutions to exactly what a client wants for their experience

Custom Experience Development

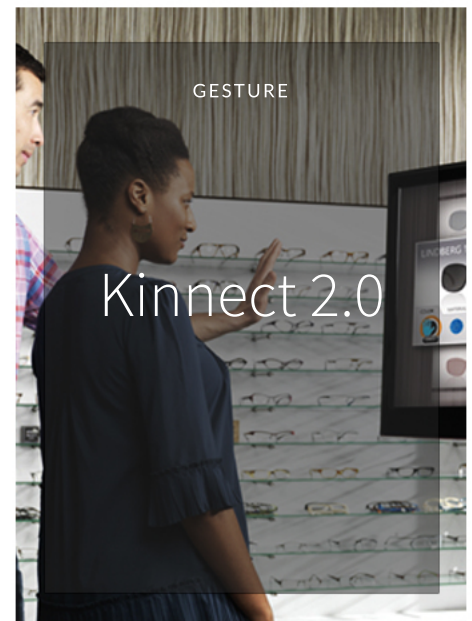

Leverage the most bleeding edge interactive mediums for experience building. At spinTouch we are developing around innovative technologies such as multi-user touch, gesture, and virtual reality to create truly unique experiences that will help your brand stand out. Our custom lead gen & analytics features will help you capture valuable user info and track impressions at your event.

Create large-scale interactive video wall experiences with our advanced multi-touch/multi-user applications.

Virtual reality offers the most dynamic and immersive way for users to interact with your brand.

Gesture based interaction offers engaging body tracking and game play capabilities well beyond traditional touch.

Case Studies

INTERACTIVE CONSULTATION, UI/UX DESIGN, IMPLEMENTATION/SUPPORT

Cisco - Tradeshow/Roadshow

Cisco and distribution partner Comstor were looking for a way to draw excitement around a technology roadshow normally consisting of dry content and brochures. spinTouch helped conceptualize and lead development for an experience that engaged guests with advanced user driven technologies that immersed users while generating valuable leads and social impressions.

Technology: Multi touch tables, Augmented Reality product showcase, interactive social media, interactive multi-touch, lead generation and user analytics.

INTERACTIVE CONSULTATION, UI/UX DESIGN, IMPLEMENTATION/SUPPORT

Catamaran - Innovation Center

spinTouch was contracted to lead interactive technology innovation at Catamaran's corporate HQ and innovation center. The goal was to create an intelligent showroom environment that recognized guests and created a custom tailored interactive experience that educated users on the benefits of Catamaran's pharma solutions through a process of discovery and wow factor.

Technology: Interactive video walls, multi touch tables, RFID user recognition, gesture video walls, Google Glass

INTERACTIVE CONSULTATION, UI/UX DESIGN, IMPLEMENTATION/SUPPORT

Acer - Event/Activation

The event dubbed "interact" was Acer's debut into the touch tablet market. Acer partnered with spinTouch to create a memorable product launch that was infused with interactivity. SpinTouch brought forward a myriad of interactive surfaces packed with powerful branding and larger than life immersive game play.

Technology: Interactive bars, projection mapping, gesture game play, large transparent multi-touch display, multi-touch product presentations.
